

# TAMS Recycling Options

Our top priority at TAMS is to provide the best options for your expiring surplus, to ensure they are properly retired. We have multiple options for handling your equipment to protect your data, protect the environment, satisfy any legal requirements, and potentially recover revenue for your equipment.

We have sought out the best certification to secure our processes, master our level of training and preparation, and to prove we are the most qualified option for handling your retiring assets. Some of those certifications include i-SIGMA NAID AAA, SERI R2v3, ISO 9000 and more. You can find our certifications below:

<https://tamsolutions.com/why-tams/>

We have separate options for your assets, information tracking, and your hard drives. Please review those options below.

## Disposition of Assets – Choose 1

### Consignment & Resale

1. All equipment is evaluated upon arrival. Equipment with potential resale value is entered into inventory for testing. Any equipment that does not have resale value will be recycled/disposed of responsibly.
2. Our R2v3 and ISO 9001 certified facility ensures all equipment is rigorously tested for performance to meet top industry standards. If it passes all tests, it is placed on the open market.
3. Data bearing material is sanitized according to R2v3 and i-SIGMA NAID AAA standards.
4. Sold equipment will generate a **revenue share of 60%** to our clients.
5. If the equipment fails our testing, we immediately recycle/dispose of it, ensuring Environmentally responsible handling as an R2v3 recycler.

OR

### Dispose All

1. All equipment is destroyed according to R2v3 and i-SIGMA NAID AAA standards, regardless of its value.
2. No revenue is generated with this option.

# Tracking Your Assets – Choose 1

## Track All Assets

ALL assets received, regardless of value or ultimate disposition, are inventoried and recorded.

1. Serial number, make, model, and client asset tag are captured (\$7.00/asset inventoried).
2. Clients receive a certificate of destruction after pickup with the following information:
  - i. Total weight of load received.
  - ii. All managed assets received.
3. If applicable, an invoice with weighted charges for sorted items (Printers, TVs, LCDs, Copiers, etc.) will be emailed.
4. Clients receive a report monthly showing the disposition of **ALL** managed assets sold or recycled/disposed of.

OR

## Track Resale Assets Only

Only assets that are determined to have resale value are inventoried and recorded. All other assets are disposed without reporting detailed item information.

1. Serial number, make, model, and client asset tag are captured FOR **RESALE ITEMS ONLY** (\$7.00/asset inventoried).
2. Clients receive a certificate of destruction after pickup with the following information:
  - i. Total weight of load received.
  - ii. All inventoried assets for potential resale.
3. If applicable, an invoice with weighted charges for sorted items (Printers, TVs, LCDs, Copiers, etc.) will be emailed.
4. Clients receive a report monthly showing the disposition of sold assets

*\*This option requires a manufacture serial number opt-out form signed) \**

# Disposition of Hard Drives and Other Data – Choose 1

**Select one as standard. May indicate special handling for different loads.**

The following options are provided for special handling of hard drives based on your company policy. All drives will be handled at the R2v3, NAID AAA standards and in compliance with NIST 800-88 r1 guidelines.

- Please note that all hard drives received by TAMS will be either wiped or shredded regardless of anything you've done prior to sending them to us.

· Wiped and refurbished hard drives generate a 60% revenue share.

**Option 1.** Use our third-party audited secure erasure process to wipe each working, valuable hard drive with a verified report. . \$7/drive + 60% Revenue Share

**Option 2.** Shred and serialize all hard drives with a serialized certificate of destruction. . . . . \$7/drive

**Option 3.** Use our third-party audited secure erasure process to wipe each working, valuable hard drive with a verified report. Failed drives or drives without value are shredded and serialized with a serialized certificate of destruction. . . . . \$7/drive + 60% revenue share

**Option 4.** Witness the shredding of serialized hard drives with a serialized certificate of destruction. . . . . \$7/drive

**Option 5.** On-site Hard drive shredding with a serialized certificate of destruction. . . . . \$150 set up fee and \$7/drive - \$750 minimum charge

## Service and Recycling Fees

### Pickup Fees

**Local Pickup** – \$150.00 pickup fee on local loads less than 2,000 lbs. If your load exceeds 2000 lbs. the pickup fee **is waived**.

**Distant Pickup** - For pickup locations beyond 40 miles, out and back, there is an additional per mile fee of \$1.50/mile past 40 miles.

**National Locations** – Pricing is available upon receipt of recoverable asset list and address for locations outside of Utah.

**TAMS Dropoff** – No charge to drop the equipment off at our location. An appointment is required prior to dropping the equipment off.

### Recycling Costs

\$.60/lb. fee for disposing of the following items:

- TVs/Monitors/LCDs (cracked screens are \$.80/lb.)
- Printers/Scanners/Copiers/Toner
